SUMMARY

Full-stack engineer with production experience owning backend modules, REST APIs, and deployment pipelines across React.js, Node.js, and MongoDB. Built fraud-resistant attendance infrastructure and Python-based automation tooling using browser-driven AI agents. Published IEEE researcher in AI and Blockchain; solved 450+ DSA problems on LeetCode.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), Redux, Tailwind CSS, Material UI, HTML5, CSS3
Backend: Node.js, Express.js, MongoDB, PostgreSQL, SQL, REST APIs, JWT Authentication, Redis
Cloud & DevOps: AWS (EC2, S3), Docker, Vercel, Netlify, Render, Git, GitHub, CI/CD
Automation & AI: Python, Playwright, AsyncIO, LLM API Integration, Workflow Automation
Testing & Tools: Jest, Postman, Figma
Other: WordPress, DotNetNuke (DNN), C++, Agile/Scrum

PROFESSIONAL EXPERIENCE

OYO	Gurugram, India
System Engineer	Dec 2025 – Present
- Engineered and delivered 7+ production modules across React.js, Node.js, and MongoDB, used by 1,000+ internal users across business functions. - Designed and maintained 30+ REST APIs, consolidating backend logic across modules to reduce duplicate implementation work. - Optimized MongoDB performance through indexing, aggregation pipeline refactoring, and query pagination/projection to improve API response times. - Deployed and managed production releases on Linux via PM2, streamlining manual deployment workflows for reliability.	
System Engineer Intern	Jun 2025 – Dec 2025
- Built an internal Inventory Management System (Django, SQL) with full role-based access control (RBAC), replacing spreadsheet-based tracking of laptop assignments and status across the team. - Automated Google Web Story publishing through an n8n workflow integrated with internal APIs, removing manual steps from the content pipeline. - Added 30+ new pages to an existing UAE regional WordPress site, expanding content coverage and structure. - Validated REST API request/response schemas in Postman across internal tool integrations, catching contract mismatches before release.	

KEY PROJECTS

Enterprise Attendance & Shift Management System React.js, Node.js, MongoDB, Socket.io	
Live: attendance-management-system-deepak.vercel.app	
- Architected an offline-first attendance system with local data queuing and a secure background sync engine, designed to support up to 10,000 employees and load-tested with 125 concurrent users. - Built a multi-layer anti-fraud framework combining geofencing (400m office radius), TOTP-based QR codes with 15-second expiry, and device-ID binding to eliminate proxy punch-ins. - Implemented real-time hierarchical approval pipelines (Employee → Manager → HR) via Socket.io and an analytics engine computing work hours, overtime, and cross-midnight shifts. - Enforced role-based access control, CSRF protection, and audit logging on all high-risk operations for compliance.	
Autonomous Job Search Agent Python, Playwright, OpenAI API, AsyncIO	
Link: https://github.com/deepak0266/Autonomous-Job-Search-Agent	
- Built an automation agent that detects when job postings on Naukri redirect to external ATS platforms (Greenhouse, Workday, Lever) and uses an LLM to autonomously complete and submit the application. - Used AsyncIO to run concurrent browser sessions, handling application workflows across multiple platforms reliably.	
Lead Management & CRM System React.js, Node.js, MongoDB, Redis, Socket.io	
Live: bhicrm.com	
- Designed and built a full-stack CRM for tracking lead lifecycle, follow-ups, and conversion status across a sales pipeline. - Implemented role-based dashboards and REST APIs for lead assignment, status tracking, and reporting.	

EDUCATION

Dronacharya Group of Institutions, Greater Noida — B.Tech, Computer Science	2021 – 2025 75.19%
B S Public School, Sadabad — Higher Secondary (Class XII), Science (PCM)	2019 – 2020 86.80%
B S Public School, Sadabad — High School (Class X)	2017 – 2018 75.83%

ACHIEVEMENTS

- Published IEEE Xplore research (ICSCAI 2024) on blockchain and AI-powered frameworks for secure service workflows.
- 1st Place, College Hackathon — led a team building an AI-based Diabetic Retinopathy Detection application.
- Solved 450+ DSA problems on LeetCode; earned a 5-Star SQL Gold Badge on HackerRank.
